Skills

Clojure (JVM, Babashka)

ClojureScript (Re-frame, Reagent)

TypeScript (Node, Deno)

JavaScript (Node, React, Vue)

PHP (Laravel, Symfony, WordPress)

Databases (MySQL, SQLite, PostgreSQL, Flat-file stores)

Testing (Unit, integration, e2e)

Languages

Estonian

Profile

I'm a Software Engineer with 12 years of work experience. I'm able to proficiently tackle business problems of great size due to my love of learning and ability to adapt quickly. I have a proven track record of finding simple solutions to complex problems.

I'm the creator and maintainer of a variety of open source projects [on my Github](#), as well as am an active participant in the open source development community as a whole, always keeping my finger on the pulse.

Employment History

Software Engineer, IPRally Technologies Oy

May 2022 – Oct 2023 Helsinki, Finland

Helped build a leading AI powered patent search engine that makes it painless to discover and categorise patents, fully equipped with graph and boolean search capabilities.

Senior Clojure Engineer, Multiply

Sep 2021 – Mar 2022 Stockholm, Sweden

I helped create a complex front-end block editor powered by a graph data model in JavaScript, ClojureScript (Reagent, Re-frame) and Clojure fully equipped with drag-and-drop functionality, and isolated collection of blocks that power the editor. Also built a component library sandbox for developing, testing and sharing of components cross-teams.

Software Engineer, GreenPowerMonitor

Sep 2018 – Mar 2021 Barcelona, Spain

Helped the renewable energy sector get more out of their plants by developing monitoring tools at the number one company in the industry. My role was to develop and maintain a SPA written in a mixture of ClojureScript, JavaScript & TypeScript, by utilising tools such as Om, Re-om, React.js and Ant Design.

Software Engineer, Digital Baboon

Jan 2017 – Aug 2018 Tallinn, Estonia

Built bespoke applications with Laravel, Symfony and React.js, Vue.js for a wide variety of industries ranging from marketing to CRM's.

Software Engineer, VURR

Aug 2016 – Jan 2017 Tallinn, Estonia

English

Spanish

I developed websites and interactive campaign single-page applications tightly integrated with social media APIs for companies such as Stockmann, Toyota, R-Kiosk and Catwees, using Laravel, WordPress and Vue.js.

Software Engineer, co-founder, Webdot

Feb 2014 – Jun 2016  Tallinn, Estonia

I co-founded a web development agency focusing on bespoke web applications for small to medium companies with our main toolkit containing WordPress and Laravel. This was a transformative experience for me because I learned how to communicate with clients, how to create briefs, estimates and how to do live presentations as well as time management.

Software Engineer, Direct Digital Reach

Sep 2011 – Dec 2013  Tallinn, Estonia

Continuing on from A2B Group, at DDR I turned complex design requirements and assets into bespoke WordPress themes for small to medium companies for whom quality was more important than quantity. I learned that the devil is in the details, and nothing rushed is ever good.

Courses

User Experience: The Beginner's Guide, The Interaction Design Foundation

Apr 2020 – Jun 2020

Design Thinking: The Beginner's Guide, The Interaction Design Foundation

Apr 2020 – Jun 2020
